CUSTOM DECORATIVE METAL PANEL

UNIZAK Trading Company, Dubai, specializes in premium customized metal panels designed for modern architectural and construction needs. Each panel is precision-crafted from high-quality metal sheets to meet exact project specifications. Ideal for commercial, residential, and institutional projects, UNIZAK metal panels combine style, strength, and sustainability, offering long-term performance and energy efficiency.

FLAT METALLIC PANEL

Metal flat panels engineered for precision, performance, and aesthetic excellence. Designed with clean lines and a smooth finish, they bring a modern, sophisticated touch to any architectural project.

Perfect for facades, ceilings, and interior applications, UNIZAK metal flat panels deliver versatility, longevity, and visual appeal, making them an ideal choice for modern construction

ONE-WAY CURVE PANEL

- UNIZAK General Trading Company offers smooth, continuous curvature that adds elegance and depth to modern interiors.
- Engineered with precision from aluminum or steel, they deliver durability, acoustic performance, and design flexibility.
- **Perfect for high-end projects such as airports, malls, and corporate spaces** across the GCC.
- Combining beauty, strength, and easy installation—a signature ceiling solution built for excellence.

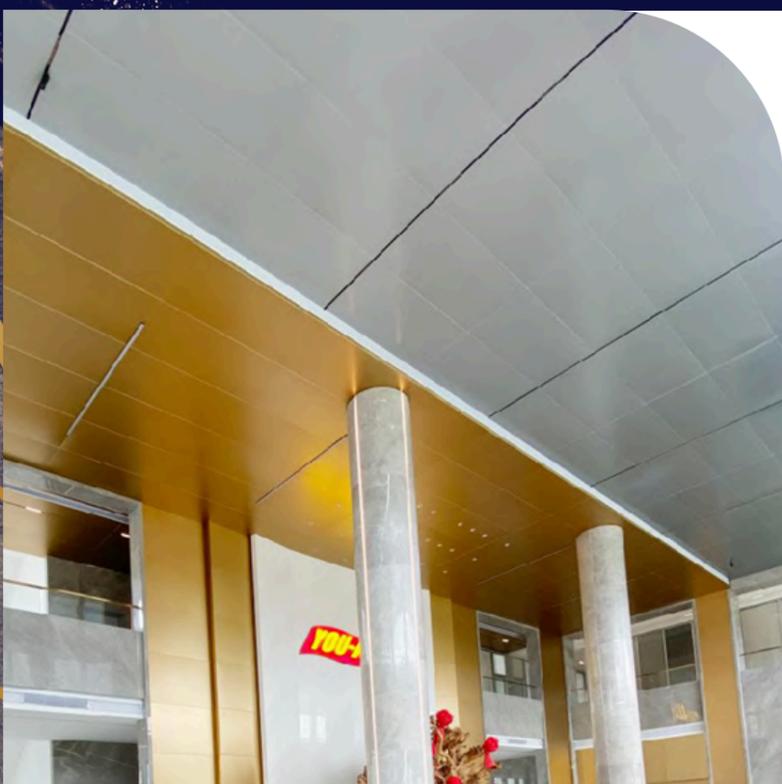

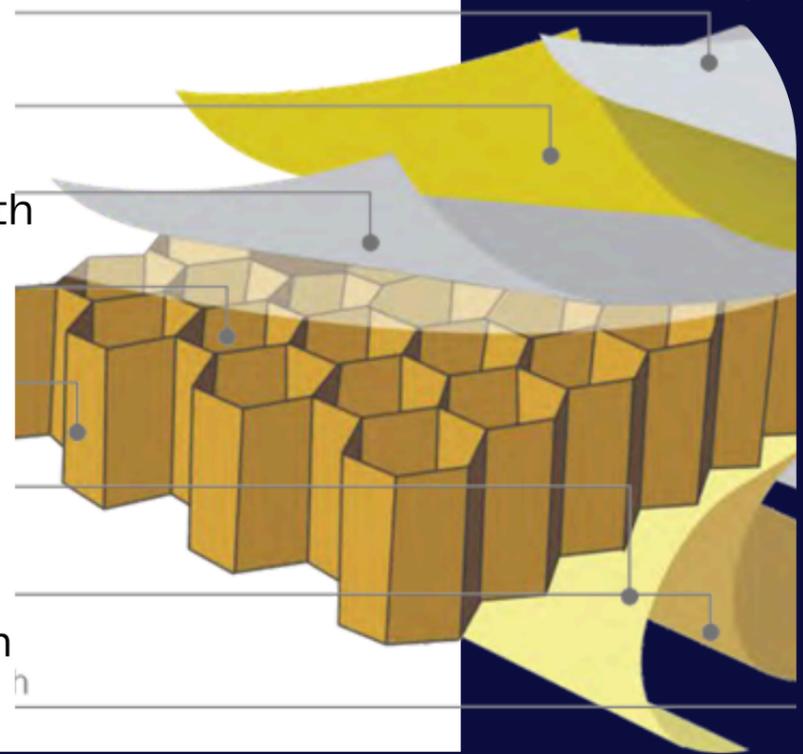

HYPERBOLIC PANEL

- Hyperbolic metal ceiling panels create a striking 3D visual effect with complex double curvature for bold architectural spaces.
- Crafted from precision-formed aluminum or steel, they combine advanced engineering with elegant, fluid design.
- **Ideal for airports, museums, luxury hotels, and iconic public buildings** across the GCC.
- A fusion of innovation, artistry, and durability redefining modern ceiling aesthetics.

HONEYCOMB PANEL

- Honeycomb metal panels, also known as sandwich panels, offer exceptional strength and lightness with an advanced aluminum honeycomb core.
- They ensure superior flatness, sound insulation, and fire resistance while maintaining a sleek architectural finish.
- **Ideal for ceilings, facades, and interior applications across high-end projects** in the GCC.

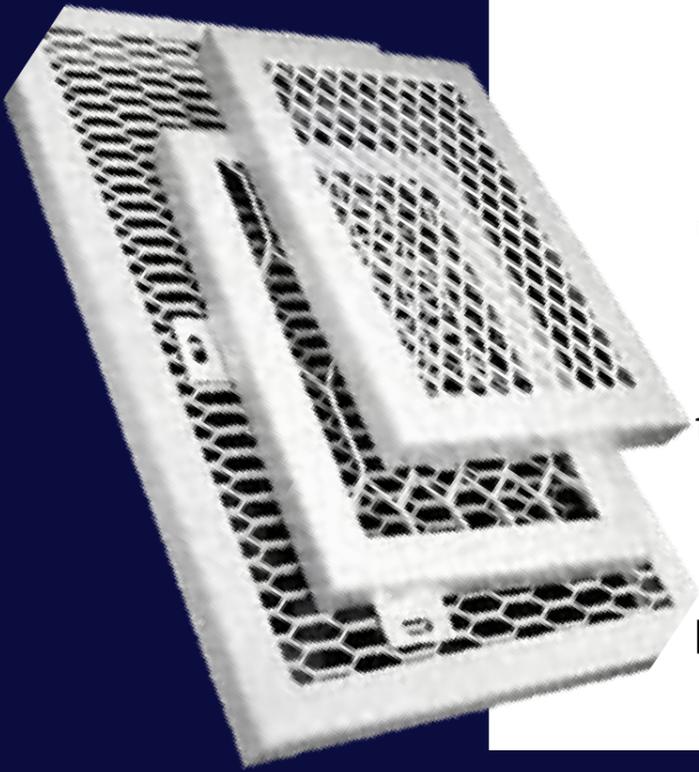

CORRUGATED PANEL

Corrugated metal panels feature a distinctive wave profile that delivers high structural strength with a modern industrial look.

Made from durable aluminum or galvanized steel, they provide excellent weather resistance and longevity in harsh GCC conditions.

Ideal for facades, roofing, and interior accents—combining functionality, aesthetics, and economy.

MESH PANEL

Mesh Metal Panels by UNIZAK General Trading Company combine transparency and strength, offering a contemporary architectural look with excellent ventilation.

Manufactured from aluminum or stainless steel, they ensure durability, corrosion resistance, and **low maintenance.**

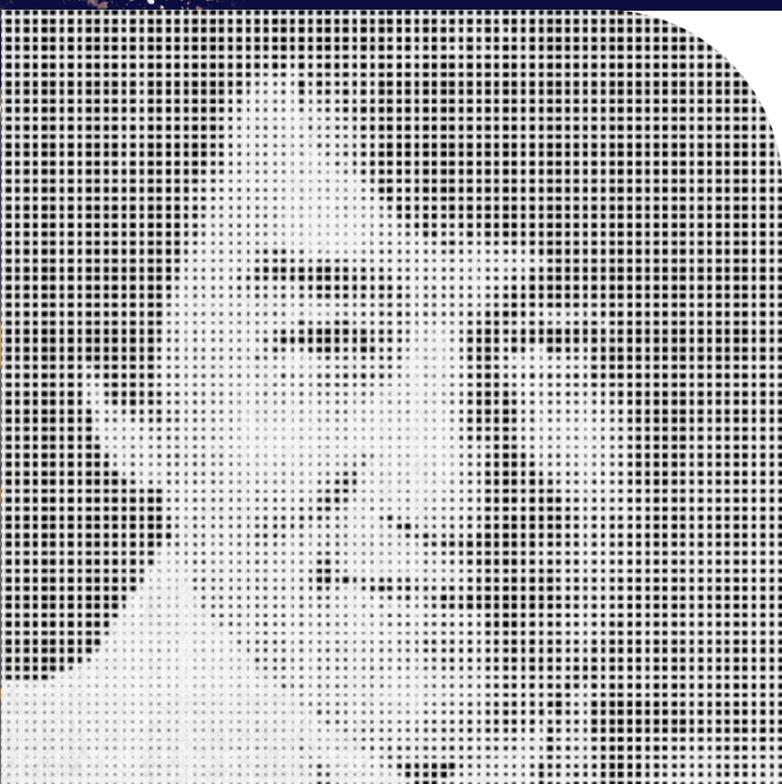

Ideal for facades, ceilings, partitions, and parking structures—blending modern design with practical performance.

WATCHBAND PANEL

Watchband Metal Panels feature interlocking linear designs that create a sleek, continuous ceiling or facade pattern.

Crafted from aluminum or steel, they offer durability, lightweight performance, and easy installation.

Ideal for modern interiors, commercial spaces, and architectural feature ceilings across the GCC.

PERFORATED PANEL

Perforated metal panels feature precision-cut holes that enhance acoustic performance, ventilation, and aesthetic appeal.

They can be fully customized with patterns, designs, or even images to match architectural visions.

Ideal for ceilings, facades, partitions, and feature walls in commercial and high-end projects across the GCC.

CARVING PANEL

The intricate, decorative patterns that are cut into metal sheets in Carving Metal Panels are a stunning addition to any space, enhancing its artistic appeal and elegance.

They can be customized with unique designs or motifs to reflect project-specific aesthetics.

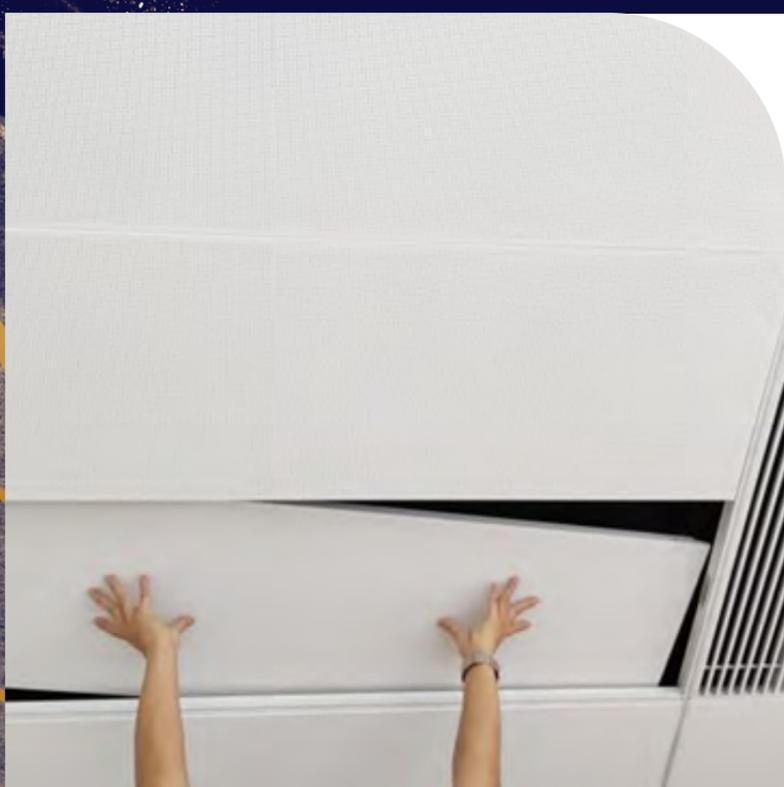

Ideal for ceilings, facades, partitions, and **feature walls in luxury and high-end projects** across the GCC.

STANDARD METALLIC PANEL

Standard metallic panels are adaptable metal sheets that are used for walls, ceilings, and facades. They are easy to install, long-lasting, and have a sleek appearance.

In order to accommodate diverse architectural and functional requirements, they are available in a variety of types, such as flat, corrugated, perforated, embossed, and linear panels.

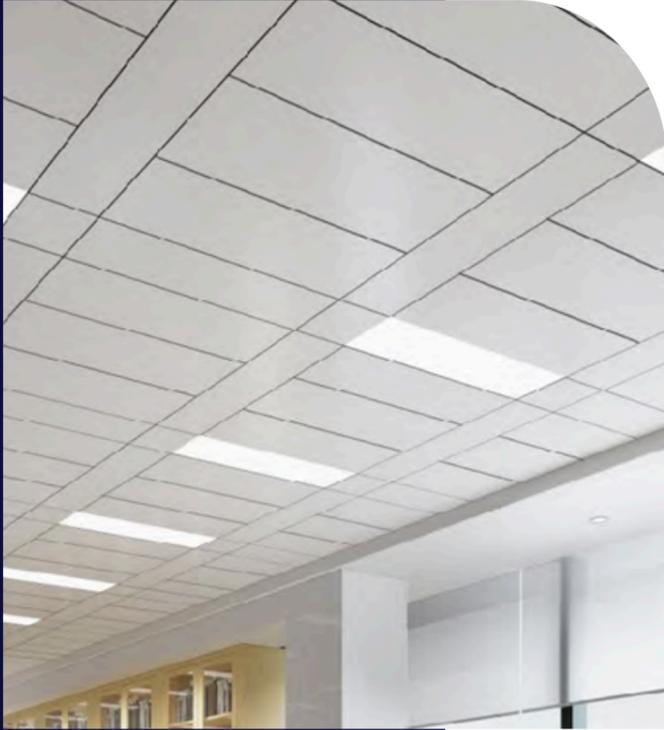

Ideal for commercial, industrial, and interior projects across the GCC.

SKY ONE CEILING PANELS

Sky One Ceiling Panels create a seamless, flowing metal surface that elevates any interior with elegance. **Lightweight, durable, and effortless to install, ensuring lasting sophistication.**

Perfect for premium offices, airports, and upscale commercial spaces in the GCC.

SKY X CEILING CLIP-IN SYSTEM

Sky X Ceiling Clip-In System delivers a refined, concealed-grid design that creates a seamless, uninterrupted ceiling plane.

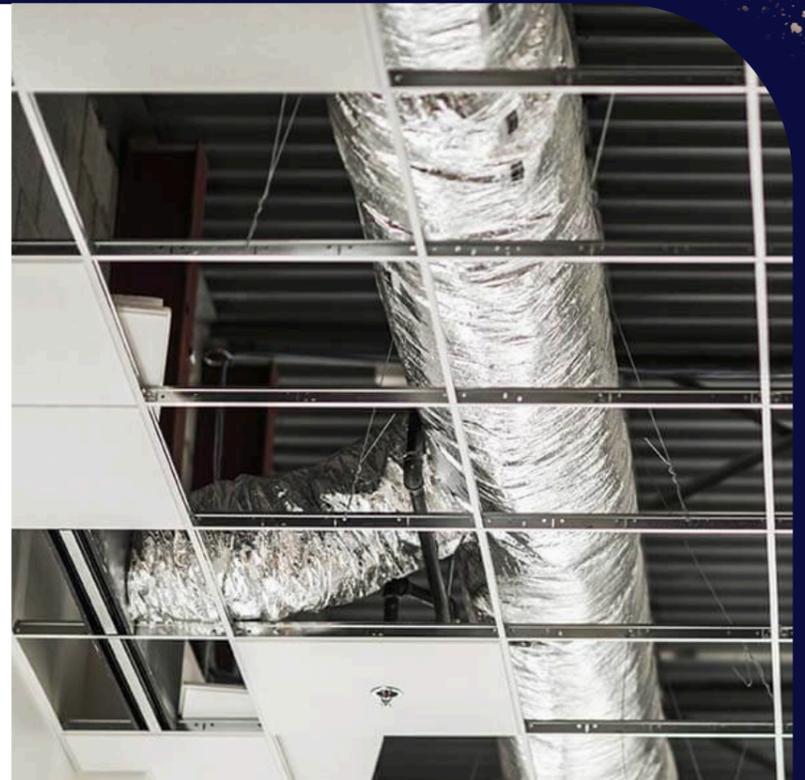

Combining precision engineering with easy maintenance, it integrates perfectly with lighting and ventilation elements.

Ideal for luxury interiors, corporate headquarters, and sophisticated commercial developments.

LAY-IN SYSTEM METAL CEILING & T GRID

Lay-In System Metal Ceiling with T-Grid offers a structured yet elegant ceiling solution with panels resting seamlessly within the grid. Designed for easy maintenance, acoustic control, and aesthetic versatility in sophisticated interiors.

Perfect for offices, hospitals, educational spaces, and premium commercial projects across the GCC.

PLANK CEILING SERIES

Perforated metal panels feature precision-cut holes that enhance acoustic performance, ventilation, and aesthetic appeal.

They can be fully customized with patterns, designs, or even images to match architectural visions.

Ideal for ceilings, facades, partitions, and feature walls in commercial and high-end projects across the GCC.

BAFFLE CEILING SERIES

Carved metal panels feature intricate, decorative patterns cut into metal sheets, adding elegance and artistic appeal to any space.

They can be customized with unique designs or motifs to reflect project-specific aesthetics.

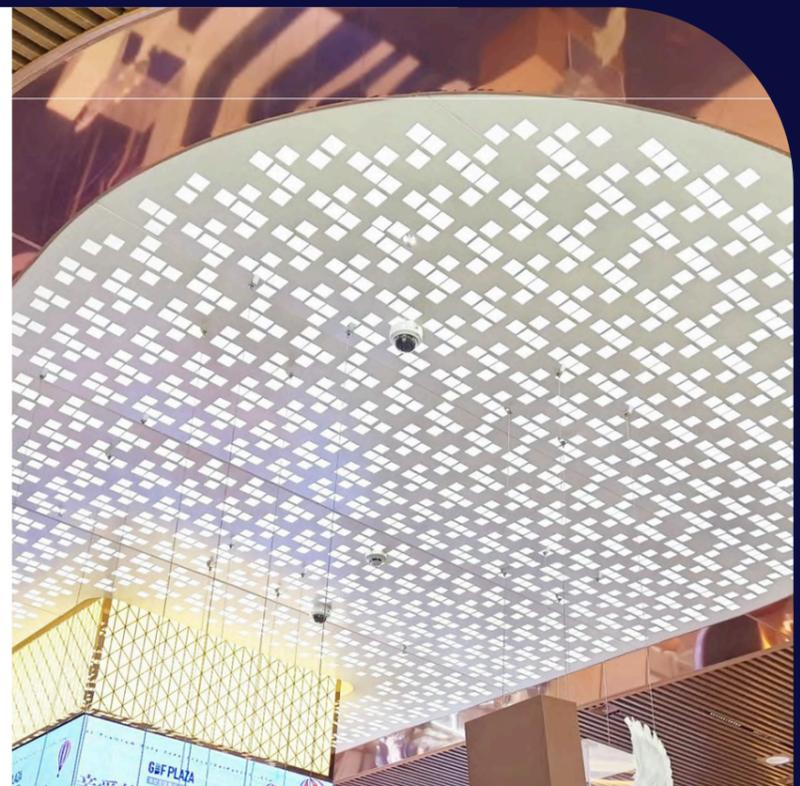

Ideal for ceilings, facades, partitions, and feature walls in luxury and high-end projects across the GCC

STANDARD METALIC – PANEL

Standard metallic panels are versatile metal sheets used for ceilings, facades, and walls, offering durability, a sleek appearance, and easy installation.

They come in various types, including flat, corrugated, perforated, embossed, and linear panels, to meet different architectural and functional needs.

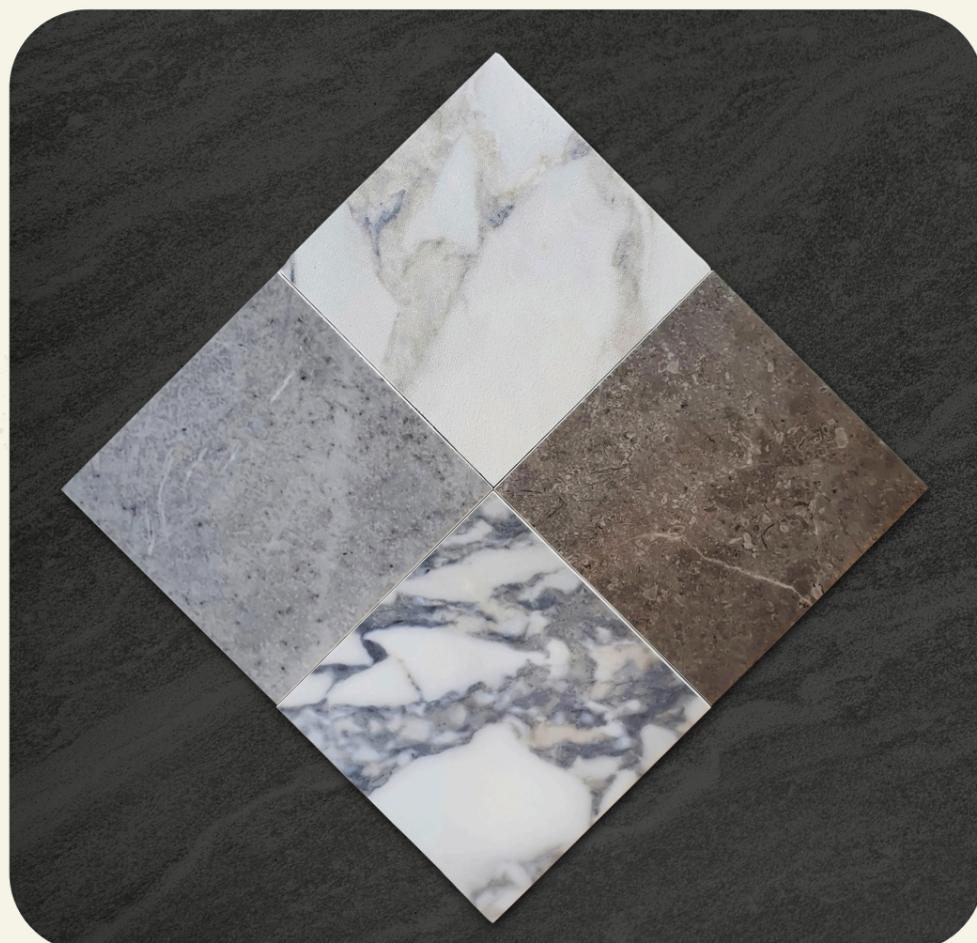

Ideal for commercial, industrial, and interior projects across the GCC.

**“Tailored solutions
crafted to your vision –
share your ideas with us,
and we’ll transform your
creativity into reality**”

“Where innovation meets luxury to enhance every architectural expression.”

CUSTOMISED MARBELS

Feature

- ✓ Flooring
- ✓ Swimming Pool
- ✓ Furnitures
- ✓ Airports/ AirBnb

WHY SHOULD I CHOOSE THIS ?

- 1.. Customised Marble transforms natural stone into bespoke designs tailored to your unique vision.
- 2.. Perfect for feature walls, countertops, furniture, and decorative elements, enabling truly exclusive interiors.
- 3.. Offers a luxurious, high-end finish while combining precision, versatility, and exceptional craftsmanship.

ULTRA THIN MARBLES

Feature

- ✓ Home
- ✓ Hotels
- ✓ Airbnb /SPA
- ✓ commercials

WHY USE OUR STAR PRODUCT?

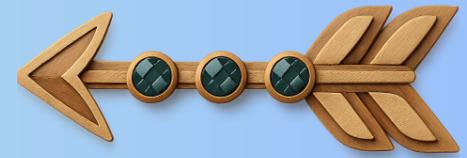

1. Ultra-Thin Marble delivers the timeless elegance of natural stone in a remarkably slim, lightweight form.
2. Perfect for wall cladding, ceilings, furniture, and decorative panels, offering versatile design with faster installation.
3. Reduces structural load, saves time and cost, while preserving natural veining and luxurious appeal.

PAINT**

SunBless is an advanced thermal coating solution designed for year-round comfort and energy efficiency.

Reduces surface temperatures by up to 20°C on concrete and 35°C on metal, lowering energy use by up to 60%.

Experience sustainable innovation that keeps interiors cooler in summer, warmer in winter, and effortlessly eco-conscious

ADVANCE SECURITY EQUIPMENTS

ADVANCED AI DETECTING CAMERA

Advanced AI Detecting Camera redefines intelligent security with precision analytics and real-time responsiveness.

Powered by next-generation AI, it ensures accurate motion, facial, and behavior detection with uncompromised reliability.

Ideal for smart buildings, corporate environments, and high-security facilities seeking innovation with elegance.

“AI-driven security engineered for tomorrow’s world.”

EXPLOSIVE TRACE DETECTOR

Explosive Trace Detector delivers rapid, accurate identification of explosive materials using advanced detection technology.

Engineered for airports, border control, defense, and critical infrastructure requiring uncompromised security.

Compact, reliable, and AI-enhanced, it ensures precision performance and instant results in high-stakes environments.

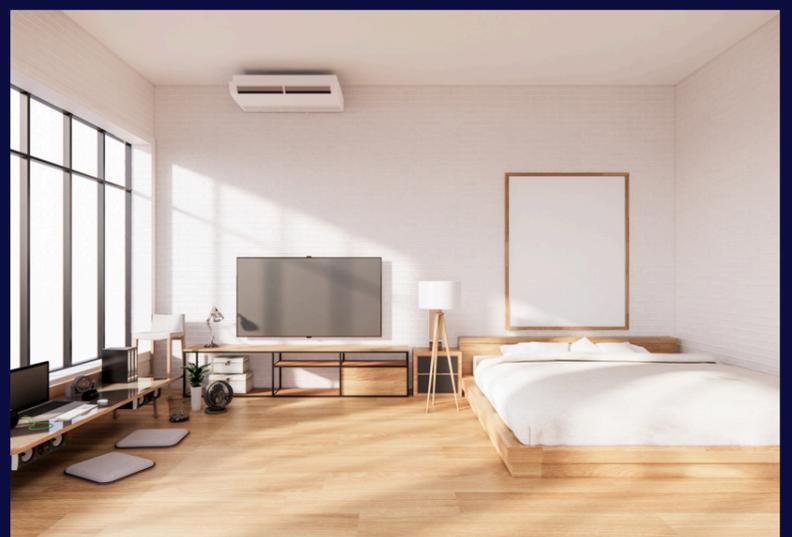

X-RAY BAGGAGE SCANNERS

“Precision. Protection. Performance – redefining modern security screening.”

X-ray baggage scanners provide advanced imaging precision for efficient, high-security screening of luggage and parcels.

Equipped with dual-energy technology and AI-assisted threat detection for unmatched accuracy and speed.

Perfect for airports, government facilities, and commercial hubs demanding reliability, safety, and operational excellence.
